Diabetes Treatment in Chennai

Diabetes is a disease occurs in which your blood glucose/sugar levels are too high. There are different types of diabetes, each with different causes, but they all share the common problem of having too much glucose in your blood stream. Diabetes is a chronic medical condition, meaning that although it can be controlled, it lasts a life time.

Don't worry, Many type of Diabetic conditions are fully reversible.

Treatments include Abyangam Treatment, Thakra Dhara Treatment and Dhanyamla Dhara Treatment. Some types of diabetes can be prevented by adopting healthy lifestyle.

Abyangam Treatment

This is not a massage; it is a therapy that helps blood flow. Brings down inflammation and promotes health. Hot medicated oil is applied to scalp and head and the whole body. The muscles are stretched and pressed to undo neuropathic conditions.

Thakra Dhara Treatment

Medicines are infused in the yogurt and set aside the previous day and poured over the head

Dhanyamla Dhara Treatment

Horse gram, sliced fruits, Navara rice, and millet grains are blended in pieces of linen and then immersed in a large water pot. The water is then boiled for a specific duration during which the extracts from the mixture leach onto the pot to form vinegar. The therapy using this liquid is known as Dhanyamla Dhara in the world of Ayurveda.

We have an excellent programme to help our patients. Customized therapies as prescribed by our doctor, we can assure you a drastic reduction in blood sugar readings and in many cases the blood sugar can be totally within range.
